"This fall, I calved my first Carpe Diem daughters. All of these females calved easily and unassisted. Better yet, they milked great and bred back with 100 percent success. Every calf from this group of females sold and brought from \$2500 to \$7500. I have used Carpe Diem EXCLUSIVELY on all of my heifers for the past 3 years. I have only had to pull 2 calves in that time period. One of those was breech and the other had a leg folded back." - Kelly Munson, Munson Cattle, LLC
